Marlan®-MK 370

The Ecology as a Thermal Barrier

Developments 2008

Marlan® MK 370

Nonwoven, based on recycled remnants of our Marko and Marlan fabrics.

Provides a genuine thermal barrier against cold and heat.

Nonwoven padding, acting together with any fabric of our ranges Marlan® or Marko®.

Marlan® MK 370

Barrier to cold and heat, for the manufacture of thermal linings.

Protection: Flame Retardant EN 531 (A, B2, C2) and Antistatic EN 1149-3

By combining this article with another range of our IR (waterproof) you obtain protection on both sides of the fabric, on the inside and the outside. Against Cold, Wind and Water.

EN 531

EN 1149-3
